

JURASSIC ART

After its piece for Only Watch 2019 was revealed it was only a matter of time before MB&F created a production version of its bipedal, cyclopean robo-clock, the Tom & T-Rex. This version is lacking the perched figure of Tom that crowns the unique piece but it still has the Morano glass eye magnifying the time. This particular L'Epee 1839 construction is off-kilter even by MB&F's starship-building, robot-loving standards. CHF 22,500 + VAT, limited to 100 pieces in blue, green and red, available from mbandf.com.
